*Developer **Full Stack** with a strong focus on **Frontend** with more than two years of experience in web design focused on **usability** and **accessibility** of the interfaces, complementing this last year with skills of **Node.js, Nest.js, Express.js, MongoDB** and **PostgreSQL** It is **API Integration**. I specialize in creating attractive and functional interfaces focused on **user experience**, with great attention to **detail**.*

PROFESSIONAL EXPERIENCE

Bigger   **Remote. Australia**
Software Developer   *July 2023–March 2024*

- I developed an automated marketing platform for advertising on social networks for brands and influencers, integrating various third-party APIs such as Google Sheets and social networks such as Facebook, TikTok, YouTube and X.
- Implemented component testing on the front-end and controller testing on the back-end.
- I designed and developed the technical documentation and user guide for the project.
- Developed a customer-facing platform for post-construction defect management, offering an all-in-one workflow system that automates and centralizes the scheduling and management of these issues.

MindHub LA   **Buenos Aires, Argentina**
FullStack Developer Mern   *March 2023–June 2023*

- Developed a technology ecommerce web application using MongoDB for database management, Web Services API for data communication and React Native for mobile application development. Node.js powered the backend, ensuring efficient operations on the server.
- I managed the project with Trello, designed with Figma and integrated payments using the MercadoPago API, resulting in a scalable, responsive and feature-rich application that offers optimized user experiences and secure e-commerce functionalities.
- I developed a web-app to upload, read manga and receive donations for developers through MercadoPago, completely in English. Technologies used: ReactJS, NodeJS, MongoDB, Express, Trello, Figma, Redux, MercadoPago API, Tailwind, GitHub.

National University of José C. Paz   **Buenos Aires, Argentina**
Technical assistant of the Virtual UNPAZ Management Department   *August 2019–March 2023*

- Moodle database administration and virtual classroom design with HTML and CSS
- User management and virtual classrooms.
- Preparation of frequently asked questions and tutorials.

EDUCATION

NATIONAL UNIVERSITY OF JOSÉ C. PAZ   **Buenos Aires, Argentina**
University Technician in Electronic Commerce   *August 2017-December 2020*
Use: 8.86
